Hello Evan,

We stopped by the mine last Friday. Following are my observations:

They are working on bringing the berms on the northeast into compliance and reclaiming the area. This will be done in the coming weeks.

They have put in a berm on the northwest side and are planting trees in the area from the road where you could see the conveyor.

They fixed fencing along Pawnee and have put a fence in between the house and the southern mine pit. They will be adding the berm to the south of the north pit into the site plan, and this will be covered in the CUP amendment.

The western pit road will be covered in the CUP amendment.

They are working on finalizing the stormwater plans and will be applying for the CUP here in the coming weeks. I will send it to the Township for comments.

Hi Dan,

Following up to see how the inspection went last week.

As a side note/question, did the mine moved forward with the county regarding the change in depth to 814 amsl on the south pit for the stormwater pond?

Dan,

I'll be at the APA conference in St Cloud, so I'll be unable to attend. If you could let the town know how the inspection goes, that would be greatly appreciated. The Town would in particular be interested to see what progress has been made on the outstanding items from the town & county inspection earlier this year.
